Contents of APPENDIX

Technical matter not of sufficient interest to the general audience of the report but of interest to specialists who want to know details go into the Appendix. Medical journals tend to relegate mathematical content of a paper into Appendix. Where needed, detailed tables can be provided in Appendix. These tables are given new numbers. In the case of thesis and dissertations, consent form, data collection form, etc., go into Appendix. When the study is small, the entire dataset can be appended.

Material on WEBSITE

Many journals now use website as a repository for detailed material. Even big datasets, computer outputs and all ancillary information is kept for reference of any interested reader.
