TIPS FOR THESIS WRITING AND PREPARING RESEARCH PAPERS

Initial parts of a manuscript
   Choice of TITLE
   Providing AUTHORSHIP credits
   Selection of KEY WORDS
   Structure of the ABSTRACT

Main body of the report
   Contents of INTRODUCTION
   Describing the METHODS
   Stating RESULTS
   Writing DISCUSSION

End features of a report
   Ethics of ACKNOWLEDGMENTS
   Framing KEY MESSAGES
   Writing REFERENCES
   Need of a BIBLIOGRAPHY
   Contents of APPENDIX

Need of BIBLIOGRAPHY

Bibliography is different from the list of references. References are those that are cited in the text. There might other articles and material that is related to the topic but not cited in the manuscript. These might be of interest to the reader if he wishes to go into the depth of that topic. Most journals do not want bibliography – they restrict to the cited references only. But a bibliography could be useful adjunct to the theses, particularly to the Doctoral dissertations. For these, thesis supervisor is the best guide to suggest which publications to include in bibliography.

Software are available to manage bibliographic references. For example, ProCite can be used in conjunction with MedLine.
